# Family Nurse Practitioner Program Overview

The McAuley School of Nursing which is housed within the College of Health Professions, was established in 1990 with the consolidation of the University of Detroit and Mercy College of Detroit. The MSON initiated the Master of Science in Nursing program in 1997 with the Family Nurse Practitioner major and in 2000, a second major, the Health Systems Management program was introduced.

Through interdisciplinary collaboration students are offered coursework through the McAuley School of Nursing and College of Health Professions. The nursing programs at the McAuley School of Nursing are fully accredited by the Commission on Collegiate Nursing Education (CCNE).

The Family Nurse Practitioner (FNP) major prepares the advanced practice nurse to provide primary health care services across the lifespan to individuals, families and aggregates in the community. Besides primary care services, critical foci include practice models which emphasize the family as unit, health promotion and disease prevention and interdisciplinary collaboration.

The post-BSN to DNP with a major in FNP requires a total of 65 credits. The MSN with a major in FNP requires a total of 47 credit hours and 750 clinical hours is required for the FNP program.

**Graduates of the FNP program are eligible to sit for the national certification examination administered by the American Nurses Credentialing Center (ANCC) or the American Academy of Nurse Practitioners Certification Program (AANPCP).**

# **Preceptor Responsibilities**

The role of the Preceptor is to facilitate the learning experience of the graduate nursing student in the selected area. The Preceptor employs communication, direct supervision, guidance and other teaching strategies to augment the learning process. Ongoing evaluation and evaluation of the student at the

# Clinical Practice Guidelines

Students are assigned to a variety of clinical areas and preceptors. Some students are assigned to one site and others may be assigned to multiple sites. Preceptors have been identified at each site as the person responsible for the direct clinical supervision. Students must complete 250 hours of clinical during each semester and fulfill the course requirements. It is the student's responsibility to track and maintain an accurate log accounting for all clinical hours (in Typhon).

A schedule of clinical days will be arranged between the student and preceptor at the beginning of the semester. The student is expected to keep this schedule as part of the professional obligation to the clinical experience. **IF FOR SOME REASON, THE STUDENT IS NOT ABLE TO ATTEND THE DAY'S CLINICAL EXPERIENCE, BOTH THE FACULTY AND THE CLINICAL PRECEPTOR MUST BE NOTIFIED AS SOON AS POSSIBLE.**

Clinical experiences have been agreed upon by the University, clinical agency and preceptor. Students are not considered employees of either the university or the clinical agency. Preceptors have volunteered their time and expertise to share with students and enhance their clinical and professional development. Preceptors have the right to withdraw from the experience at any time. Students must maintain compliance with all regulatory, OSHA, HIPPA and health policy guidelines including ACE and malpractice insurance.

## **Policy for Break/Lunch Periods**

The MSON supports restorative time for all graduate level students in clinical rotations in the form of short breaks and/or lunch period. Students should negotiate break times with their preceptor that correspond to the needs of the unit/environment.

## **Policy for Length of Time between Student's Job and Clinical**

Students who work before a set clinical time are required to have at least six hours between work and clinical. This will minimize fatigue and improve patient safety. Failure to follow this policy may result in placement on academic probation, failure in the course, and/or dismissal from the program.

**COURSE TITLE:**

**COURSE #**

**NUR 5150**

**COURSE #**

**NUR 5160**

**COURSE TITLE:**

**Advanced Health Assessment**

**CREDITS:**

3 credits

**Course Description:** This clinical course focuses on the development of advanced health assessment skills in the role of an advanced practice nurse caring for clients and families. Students will develop and refine advanced health assessment skills using evidence-based techniques and tools to formulate differential diagnoses, health promotion and risk reduction opportunities.

<b>COURSE OBJECTIVES:</b>		<b>MSON Grad</b>	<b>MSN Essentials</b>
1. Assess the health status of the client and family			
2. Perform a comprehensive health assessment			
3. Identify and document health assessment findings			
4. Formulate a differential diagnosis			
5. Implement health promotion and risk reduction strategies			
6. Evaluate the effectiveness of health assessment interventions			

**COURSE #** NUR 5250

**COURSE TITLE** Common and Episodic Problems Across the Lifespan

**CREDITS** 3 credits

**Course Description:**

This course focuses on the common and episodic problems across the lifespan. The course is designed to provide students with a comprehensive understanding of the physical, psychological, and social aspects of health and illness across the lifespan. The course is designed to provide students with a comprehensive understanding of the physical, psychological, and social aspects of health and illness across the lifespan.

**COURSE #**                      **NUR 6130**

**COURSE TITLE:**              **Procedures and Diagnostic Workshop for the APN**

**CREDITS:**                      1 lab credit

**Course Description:** This laboratory-based course provides the advanced practice nursing student an introduction to a variety of selected diagnostic and therapeutic procedures. This course enables the advanced practice student to acquire beginning or entry level procedural competencies to clinically manage selected clients in primary care. Students apply the principles of safety, quality, and ethics while examining the legal and regulatory processes that impact practice and outcomes.

[REDACTED]		

**COURSE #**            **NUR 6260**

**COURSE TITLE:**    **Primary Care of the Family IV: Psychosocial Issues and Health Integration Across the Lifespan**

**CREDITS:**            2 credits clinical

**Course Description:**

This final clinical course focuses on the clinical basis for the advanced nursing practice with a focus on health integration and management approaches for the family. The student's collaborative role with other health care providers is promoted and continually developed. Clinical experiences are in a variety of primary care and community settings under the supervision of faculty and preceptors. Clinical experiences are in a variety of primary care and community settings under the supervision of faculty and preceptors. Clinical practice includes advanced assessment and implementation of scientifically based therapeutic regimens of disease management, health promotion and risk reduction.

COURSE OBJECTIVES:	MSON	MSN

**COURSE #**            **NUR 6030**

**COURSE TITLE:**   **Professional Role Development: Leadership, Business and Management Practices for the Nurse Practitioner**

**CREDITS**            2 credits

**Course Description**

In this course, students analyze the theoretical and empirical bases for leadership behavior, management principles, and role performance in the context of advanced clinical nursing practice. Concepts related to vision, strategic thinking, quality management/improvement, collaboration/team-building, empowerment, change, case management, negotiation, diversity, sound fiscal management, political activism, reimbursement and evaluation provide a framework for consideration of issues associated
